

A 50% Lab Technician position is available from Nov 1st, 2021 until Oct 31st, 2022, at the University of Bern in collaboration with the Society for Cancer Research (Arlesheim near Basel). The working place is Arlesheim.

Lab Technician Position for Integrative Medicine Fundamental Research Project

Our laboratory is dedicated to investigating the biochemical and physico-chemical aspects of potentized preparations as used in homeopathy and anthroposophic medicine. The drive behind such experiments is that investigating preclinical properties of potentized preparations could explain some effects observed in clinical studies and settings.

In this project we are looking for a Lab Technician, to investigate biochemical properties of potentized preparations, through flow cytometry experiments.

Your responsibilities

- Cell-biological analysis of human blood specimens using flow cytometry
- Management of database registering these specimens
- Preparation of experimental dilutions
- Careful documentation of all data

Your profile

- Education as biology laboratory technician
- Good social, administrative and computer skills
- Hands-on experience in cell biology and flow cytometry
- Knowledge of usual flow cytometry software
- Strong motivation and flexibility
- Interest in complementary and integrative medicine

We offer

We offer an enthusiastic research group, an inspiring international research environment, at an attractive working location in Arlesheim near Basel. The remuneration is in accordance with the University of Bern salary scales.

How to apply

Please send your application, which should include a motivation letter, CV and references (letters / contact information of two referees) by email to: Dr. Alexander Tournier at <alexander.tournier@ikim.unibe.ch>. For questions regarding the project please contact <alexander.tournier@ikim.unibe.ch>. More information about the group you find under: <https://www.ikim.unibe.ch/>
